

NEWS RELEASE

INTRODUCING AMIBROWSER MODERN WEB BROWSING FOR THE A1200 NG & A600 GS

Cardiff, 6th August 2025

After many user requests, a new modern web browser has been developed by Amiga Kit. This new browser runs on AmiBench and offers the most advanced Classic browsing experience to date.

AmiBrowser is an HTML 5 capable web browser built for 68K with Zune/MUI. It uses ARM libraries to power the native rendering of the web pages.

Matthew Leaman, Managing Director of AmigaKit Ltd remarked: *"We are pleased that after many weeks of development work we can shortly offer this ground breaking application for the A600 GS and the A1200 NG user base. This has been the most requested application and we are excited to continue our commitment to delivering regular product updates."*

The **A600 GS** and the **A1200 NG** computer systems are now available to purchase from AmigaKit.com. Additional Information about the **A600 GS** and the **A1200 NG** can be found on these websites:

A600GS: www.a600gs.com
